**MANN-FILTER – Perfect parts. Perfect service.**

# Filters in OE matching quality

## MANN-FILTER solutions for your agricultural machines

Filters in tractors, combine harvesters or field choppers have to do their job under difficult conditions. Lots of dust and very high mechanical loads make high demands on the filtration process – for the benefit of the machine and operator. MANN-FILTER offers you the best protection for your machines and your health with our brand standing for OE matching quality. MANN+HUMMEL is a development partner to almost all well-known manufacturers of agricultural machines in the world.

### Quality which always pays for itself

**Special tasks.** Modern combustion engines used for heavy duty operations need high performance filter technology in OE matching quality. This is where our 70 years of experience in the development of efficient filter solutions comes into play. Leading manufacturers of agricultural machines trust high quality MANN+HUMMEL products – the best proof of our outstanding expertise.

### An excellent and wide product range

**Comprehensive product range.** For air filters, oil filters, fuel filters, cabin filters and hydraulic filters: MANN-FILTER has the highest product and market coverage with OEM producers for all common agricultural machines. We supply the right filter to almost all models for well-known manufacturers.

### Full service which impresses

**Concerted action.** High availability and quick delivery are natural for us – with comprehensive after-sales service. Our customers also appreciate our modern information tools: the useful MANN-FILTER app for smartphones and tablets, and our clearly structured catalogue available on CD, online or in printed form.

### With MANN-FILTER everything done right

**Safe choice.** Decide for quality filters from MANN-FILTER and achieve the service interval defined by the machine manufacturer. Long machine running times and perfect protection are advantages which benefit the health of the operator and machine and also save our customers money.

done right!**

# Our product details

The lifetime and economy of agricultural machines mainly depends on the functional reliability of the filter. With MANN-FILTER products you make no compromises and decide for OE matching quality. We continuously test our products in our own testing facilities according to international, applicable industrial standards.

## Air filter elements

**Best protection against sucked in dirt.** You might think there is a contradiction between high dust levels and a long service life. This is not the case – in fact our air filter elements prove the opposite. A high dust holding capacity ensures long and efficient running times. Therefore high quality air filter elements from MANN-FILTER save customers money.

## Oil and hydraulic filters

**Making things run smoothly.** Oil filters reliably separate contaminants from the oil circuit. Clean oil reduces friction in bearings, lubrication gaps and moving parts and lengthens the service life of the engine and hydraulic unit.

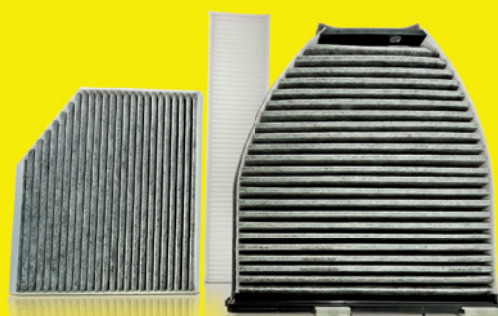

## Fuel filter

**Maximise performance and help to avoid engine failure.** Reliable protection for sensitive parts: dirt particles and water in the fuel are reliably filtered out to prevent wear and corrosion.

## Cabin filters

**For the health and comfort of the cabin driver.** Pollen and other ultra-fine particles harm health and make life more difficult for the operators of agricultural machines. Our cabin filters ensure a good climate inside the driver's cabin – so that the driver can relax and breathe fresh air at all times.

# Modern information channels

## Always up-to-date with agricultural machines

### On the road: the mobile catalogue

Always there, always up-to-date: use your smartphone to get the practical catalogue for your pocket. Simply scan in the adjacent code.
