

## Premium and E-Line – two perfect solutions

**At MANN+HUMMEL you can choose between two products for your wire-EDM and cavity sinking EDM machines:**

The H 15 190/16 Premium model has proven itself with its OEM quality. It is recommended by machine producers and offers the longest service life.

The new E-Line is the cost-effective high-performance alternative to copied products. It stands for:

- maximum filtration quality - the same as the H 15 190/16
- no chemical influence of the dielectric fluid
- excellent service life

MANN+HUMMEL is a development partner and OEM partner to Agie and Charmilles.

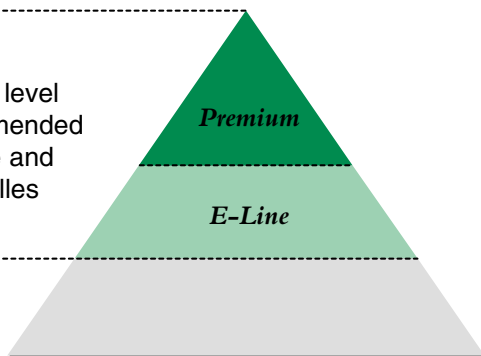

Therefore Premium and E-Line are approved products for use in these machines.

E-Line

H 15 190/16 Premium

Quality level recommended by Agie and Charmilles

**Whether you opt for the Premium or the E-Line, EDM filters from OEM supplier MANN+HUMMEL offer you the best security.**
